

GRISWOLD™ Open Cell Rubber

Re: State of California Safe Drinking Water and Toxic Enforcement Act (Proposition 65) as of 4/21/2023

Thank you for your recent inquiry with respect to whether GRISWOLD™ Rubber products contain any of the substances on the current List of Chemicals Known to the State of California Known to Cause Cancer or Reproductive Toxicity. The list is published annually as required by the regulation.

The following chemicals are present in GRISWOLD™ Rubber.

Chemical Name	CAS Number	Concentration by weight
Silica, Crystalline	14808-60-7, 7631-86-9	<7%
Titanium Dioxide	13463-67-7	<12%

An additional chemical is present in black & colored GRISWOLD™ Rubber.

Chemical Name	CAS Number	Concentration by weight
Carbon Black	1333-86-4	<25%

The materials listed above are bound within the polymer and therefore not in a respirable form presenting an inhalation hazard per Proposition 65. Therefore, no warning statement is required.

If further assistance is needed, please contact Customer Service at orders@griswoldproducts.com.

In order for Griswold Products LLC to be able to provide accurate information to our customers we are relying on our suppliers to verify if the "substances" and "preparations" that they provide contain California Proposition 65 listed substances as noted in the Material Safety Data Sheet/Safety Data Sheet (MSDS/SDS) of the materials used to produce our products. The determination of both the presence of a substance and level is based on calculation and not the result of any actual testing. Griswold Products LLC makes no representation that it has verified the accuracy of the MSDS/SDS information or for incomplete or inaccurate information contained in this statement.
